

**Evidence-based management of
Complex Regional Pain Syndrome:
*Emerging strategies for assessment and treatment***

**Hotel Dieu Hospital, Kingston, ON
Auditorium, Johnson 1
9 am to 5 pm, November 1, 2014**

SPEAKER:

Tara Packham

is an occupational therapist with 20-plus years of clinical experience in the treatment of hand injuries; she is certified in somatosensory rehabilitation through the University of Brussels. Tara is currently a CIHR doctoral scholar completing PhD studies at McMaster University with Dr. Joy MacDermid. Her research interests are focused on advancing the management of complex regional pain syndrome (CRPS) through better early identification, assessment and rehabilitation.

This full-day workshop will review contemporary theories for the pathogenesis of CRPS, and how these can inform early identification and management of this syndrome. Participants will:

- ◆ learn how to select and use appropriate tools from a battery of standardized assessment techniques to inform treatment strategies, and
- ◆ understand how to employ and adapt evidence-based treatment methods with their individual clients.

FEES

Early Bird (by Sept. 30, 2014)

Occupational and Physical Therapists: **\$ 150**

Late Registration (after Oct. 1, 2014)

Occupational and Physical Therapists: **\$ 170**
